

THE RUGGED, COMPACT ABRASIVE BLASTING LIGHT

- Low voltage (12V) operation.
- Utilizes a high intensity halogen reflector lamp.
- Compact, lightweight design. Weighs only 19 ounces with mounting bracket and hose clamps.
- Rugged all metal construction. Not plastic.
- Doesn't require the troublesome air line for cooling.
- "Deadman" remote control switch is available for attachment to the light mounting bracket for safe control of blast operation.
- The light is shipped complete and ready to operate with all accessories. The light system includes power supply (120V), light with lamp, cord (125 FT), hose mounting bracket/clamps and handle.
- The power supply is in a gasketed enclosure and includes transformer, "Power on" indicator light, fuses and twist - lock receptacles to connect the light.
- Easily replaceable 1/4" thick lens.
- Power cord is swaged into the light housing.
